Looking for a great show or assembly program that's fun and yet covers your astronomy curriculum? This is it! **The Space Roadshow** is an **in-school field trip** to the universe! This live program is presented by science teacher Lee Ognibene, retired director of the Sayville Planetarium and 1998 Suffolk County Science Teacher of the Year. .

**The Space Roadshow** will transform your auditorium, cafeteria, multi-purpose room, or gym into an exciting astronomy show. Teachers are always amazed how much the students remember even months after seeing this show. Many teachers comment it's like a cross between Bill Nye, a live Disney show, an IMAX movie, a planetarium show.

My powerful video projector will light up your screen or white wall with jaw-dropping video space scenes with awesome sound effects and music from my quality sound system. I provide live commentary as we tour the solar system and Milky Way Galaxy, and take field trips to the moon, the International Space Station, Meteor Crater in Arizona, Cape Canaveral in Florida, an observatory, and a solar eclipse in Hawaii. We also travel to Italy to follow Galileo's discoveries. There's even a follow-up art project where your kids can make wonderful chalk drawings of a total solar eclipse. Many live interactive demonstrations and experiments round out the experience.

**The Space Roadshow** is very economical because there is no limit on the number of students who can see the show at the same time. Unlike outside field trips, the Space Roadshow comes to your school so you will have the benefit of saving money on expensive bus transportation and admission fees. Outside field trips can take a whole day but the Space Roadshow is only 1 hour long and provides **more** learning!. Because the show is live, it can be customized for any grade level, from Kindergarten to 9<sup>th</sup> grade.

During the show, I wear a NASA flight suit, just like the astronauts use. There's lots of humor in the show and after each show, I always hear the kids and teachers say, "That was awesome!" The finale will take your breath away! Expect rave reviews!

**Fee: \$350 for one show. (Book back-to-back shows, only \$290 each. They can be different shows for different grades)** Call (646) 725-8439 to book shows or to ask questions. E-mail me at [spaceroadshow@yahoo.com](mailto:spaceroadshow@yahoo.com) Your students will **love** the **Space Roadshow**! Space will never be the same! Call soon to reserve dates.

**F.Y.I.:** I do 4 other excellent shows.

The **BUG Roadshow** is a very entertaining show that covers your science curriculum on insect characteristics, adaptations and life cycles. It's very humorous and a great show to learn all about a bug's life. (Perfect for K-6<sup>th</sup>)

**Under the Sea** is an amazing oceanography presentation that will take you on a field trip to the last frontier- our oceans. This show covers and exceeds the NY oceanography curriculum. We live on Long Island so we should know all about the ocean that surrounds us! After you see this show, you will understand that our oceans are vital to all life on Earth, even ours! (Good for 2<sup>nd</sup> - 8<sup>th</sup> grade)

**Rainforest Adventure** is an exciting show about the plants and animals of the rainforest. Your students will learn why rainforests are so important and how loggers and hunters are harming the rainforest's exotic plants and animals. This show will make you feel like you just took a field trip to a rainforest and is an adventure to another world. (K-8<sup>th</sup> grade).

[Our Endangered Earth](#) is an inspiring environmental education show about how man is hurting our planet and what each of us can do to help save Earth. **This show is a perfect way to celebrate [Earth Day](#) in April.** (2<sup>nd</sup> to 12<sup>th</sup> grade).
