Looking for a great **virtual or live show** that's fun and yet covers your astronomy curriculum? This is it! Whether it's **streamed or live**, this astronomy show will delight your students and cover your NY State astronomy curriculum. It's presented by science teacher Lee Ognibene, retired director of the Sayville Planetarium and 1998 Suffolk County Science Teacher of the Year. Length: 50 minutes. Perfect for grades K-6.

Experience jaw-dropping hi-definition video space scenes with awesome sound effects, music, and live commentary as we tour the solar system, Milky Way Galaxy, the moon, the International Space Station, Meteor Crater in Arizona, Cape Canaveral in Florida, an observatory, and a solar eclipse in Hawaii. We will also travel to Italy and the moon to try Galileo's gravity experiment. You'll see me in the video reporting live from these places like a news reporter.

Your students will also learn about motions of the earth and moon, what causes day and night, what causes the phases of the moon, orbital mechanics, weightlessness, eclipses, telescopes, the solar system, comets, meteors, the sun, our moon, how craters form, galaxies, how big space is, the birth and death of stars, gravity, how rockets work, and our place in space. There's even a follow-up art project where your kids can make a beautiful chalk drawing of a total solar eclipse. They love it! Many live **interactive** demonstrations and experiments round out the experience. It's edutainment at its best!

There's even lots of humor in the show and after each show, I always hear the kids and teachers say, "That was awesome!" The finale will take your breath away! Expect rave reviews!

If you book a VIRTUAL SHOW, I will send you a link to my streaming service and a one-day password. Just click the link to my streaming service, put in the password and enjoy the show on your smartboard with your class. If you don't have smart boards or laptop computers in every classroom, project the show on a screen in your classroom, cafeteria or media center with a video projector and stream it with a laptop computer using your schools' Wi-Fi.

Distance-learning students can see it at home during school hours!

Price: \$350 for one-day Virtual Shows for the WHOLE School! Every class can stream the show on that day at all different times! It's a bargain!

If you book a LIVE SHOW, I will come to your school and present a live show using my own quality equipment. **Same Price: \$350** for one live 50 minute showing at your school.

All my shows are approved by all 3 Long Island BOCES Arts in Education programs.

They are listed in the online BOCES Arts in Ed catalogs under "Exploratory Enrichment".

To find the Space Roadshow, search keyword "astronomy" or search "Ognibene" to find all 6 of my shows.

Check out my 5 other science shows on my website: scienceroadshows.com

(Dinosaurs, Rainforest Adventure, Bug Roadshow, Our Endangered Earth, and Under the Sea.)

All of these shows continue to receive rave reviews. All my shows make science fun and engaging and yet cover your science curriculum! They are the best shows on Long Island! Make learning Science fun again!
